#### FUND OBJECTIVE

The fund is strictly managed in accordance with Shari'ah (Islamic Law) and therefore does not invest in shares of companies whose core business involves dealing in alcohol, gambling, non-halal foodstuffs or interest-bearing instruments. The Shari'ah Supervisory Board oversees adherence to the applicable Shari'ah principles. This fund specifically adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as interpreted by the Shari'ah Supervisory Board.

#### WHO IS THIS FUND FOR?

This fund is suited to investors with a long-term investment horizon seeking to maximise growth in a Shari'ah compliant fund. They are able to accept the risks associated with equity funds and also the mandate risk of a more limited investment universe.

#### NON-PERMISSIBLE INCOME

Incidental income deemed to be non-permissible is paid to the charitable trust elected by the Shari'ah Supervisory Board in line with the principles of Shari'ah and the supplemental deed of the fund. Non-permissible income does not form part of the investor's income.

#### INVESTMENT MANDATE

The fund is a Shari'ah compliant fund which provides investors with cost-effective access to a broad spectrum of local and international listed investments.

#### REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

## OLD MUTUAL ALBARAKA EQUITY FUND

### PORTFOLIO MANAGERS COMMENTARY AS AT 30/06/2024

OLD MUTUAL INVESTMENT GROUP

**MAAHIR JAKOET**

- BCom (Hons) UCT, MBA
- 12 years of investment experience

**FAWAZ FAKIER**

- CFA, FRM, BCom honours (Finance)
- 17 years of investment experience

This is a heavy election year, with nearly half the world's population either having voted or still expected to vote. During the quarter, elections in India and Mexico saw markets sell off. In South Africa, elections also had a significant impact on markets, with initial trepidation, ultimately giving way to relief as markets cheered the ANC decision to form a Government of National Unity (GNU). South African assets rallied strongly in June with the rand firming 3% against the US dollar. South African equities delivered a return of 8.2% in the quarter and bonds delivered a return of 7.5%. Locally oriented equities, including banks and retailers, led the overall market higher, while rand hedge stocks and mining stocks lagged the overall index.

Global equities continued to outperform global bonds, rising 3.1% in US dollar terms, compared to the global bonds, which were down -1.9% during the quarter. Global equity performance continues to be driven by the US and within that by the performance of a handful of mega tech stocks. The S&P 500 was up 4.3% in the quarter significantly outpacing the equally weighted S&P 500 Index, which was down -2.6%. Year-to-date just six stocks (MSFT, NVDA, AAPL, GOOGL, AMZN, META) have contributed 62% of the S&P 500's 15% rise. During the quarter commodity price performance was mixed. Precious metals including silver, platinum and gold were up

19.7%, 10.4% and 5.3% respectively. Copper was also up close to 10% but iron ore, crude oil and palladium were all down in the quarter in dollar terms.

Among the asset classes, the underweight in local equity was the biggest alpha driver. Our local underweight positions in materials and global overweight in healthcare, were the largest contributors on a sector level, while our local overweight to Consumer Staples and global underweight to Information Technology detracted from performance. On a security level, the fund's underweight positions in Anglo Plats and BHP Group contributed to performance, while the underweight in Anglo American and overweight in Metair detracted most from performance.

The SA economic growth landscape has some green shoots following the formation of the GNU and lower loadshedding. Furthermore, there is an ongoing recovery in tourism and the two-pot system reform should aid in additional growth, not without some upside risk. A further benefit to mention is that we might see a South African Reserve Bank response to an improved inflation outlook before the end of the year. The fund is positioned to benefit from the increased value unlock in SA Inc.

The next election to watch is that of the US, to be held on 5 November, where current polls favour Donald Trump over Joe Biden. Global

markets remain focused on the outlook for growth and inflation. Inflation continues to moderate in major developed economies but remains well above target in the US and Europe. In the US, while there are some signs of slowing growth, the labour market has remained resilient. This means interest rates are likely to remain higher for longer. However, in the eurozone, the European Central Bank cut interest rates at its last meeting, as growth is weak, and inflation shows signs of heading back to target.

Unsurprisingly, China data suggests the stalling of consumer confidence and household consumption, as the housing sector continues to deteriorate, diversified miners are offering some value. We need to observe with caution as the proprietary inhouse quantitative Macro Economic Indicators point us to a reflationary mid to late cycle, globally. Contrastingly, locally, our indicators show a late-cycle recession.

Within the allowable Shari'ah universe, there was a forced selling of Equites Property, which became non-Shari'ah-compliant over the quarter ending June 2024. The fund's asset allocation currently comprises 32% in global equity, 66.0% in local equity, and the balance in cash (non-interest bearing). The fund stays fully invested as we believe that clients will benefit from equities over the long term.

### OTHER INVESTMENT CONSIDERATIONS

**MINIMUM INVESTMENTS\*:**

- Monthly: R500
- Lump sum: R10 000
- Ad hoc: R500 (in addition to your monthly or lump sum investment)

\* These investment minimums are not limited to this fund. They can be apportioned across the funds you have selected in your investment contract.

**INITIAL CHARGES (Incl. VAT):**

Initial adviser fee will be between 0% and 3.45%.

**ONGOING**

	Class A	Class B1
Annual service fees (excl. VAT)	1.50%	1.10%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

Total Expenses (Incl. Annual Service Fee) (30/06/2024)	36 Months		12 Months	
	Class A	Class B1	Class A	Class B1
Total Expense Ratio (TER) Incl. VAT	1.77%	1.31%	1.78%	1.32%
Transaction Cost (TC)	0.08%	0.08%	0.04%	0.04%
Total Investment Charge	1.85%	1.39%	1.82%	1.36%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

### DISCLOSURES

**We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.**

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at [www.oldmutualinvest.com](http://www.oldmutualinvest.com) or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 July 2024. Sources: Morningstar and Old Mutual Investment Group (FSP no. 604).

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002. Old Mutual is a member of the Association for Savings and Investment South Africa (ASISA). Old Mutual Unit Trust Managers has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.

Trustee: Standard Chartered Bank, PO Box 782080, Sandton 2146. Tel: +27 11 217 6600, Fax: +27 11 217 6642.
